

。。。。避難場所

Chapter 10. **Location of Evacuation Areas and Evacuation Procedures** **during a Disaster**

(Taken from the Student Life Handbook of Dokkyo Medical University)

Location of Evacuation Areas for Evacuation During a Disaster

Inner courtyard, west area parking lots, training ground.

(See highlighted areas in the building layout of the university)

Evacuation Procedures

- 1) When the disaster occurs, do not panic and remain calm and listen to the instructions from your teacher and to any broadcasts.
- 2) Follow any instructions given and do not panic and calmly evacuate using the hallways and stairways.
- 3) When evacuating, observe the basic principles of “do not push”, “do not run”, “do not talk”, and “do not return”.
- 4) During an evacuation, never use the elevators.
- 5) When a fire occurs, lower your posture so that you do not inhale smoke and use a handkerchief to cover your mouth and nose.
- 6) When indoors try to walk along the walls as smoke from the fire will make it difficult to see around you.

Dokkyo Medical University Firefighting Plans (excerpts)
